

# Road Map for 2019

**Paul LUU, Executive Secretary**

# Orientations & activities

In line with the actions carried out in 2018, it is proposed the following activities during the year 2010:

RM 1

- Continuation of the **work of the STC**
- Continued work on the **collaborative platform**
- Specific **work to be continued with public and private funders**
- Strengthening of **regional level** of the Initiative
- Contribution to **international debates on carbon sequestration** in soils including Koronivia process
- **Communication**
- Continuation of the **every work of the Exc. Sec.**

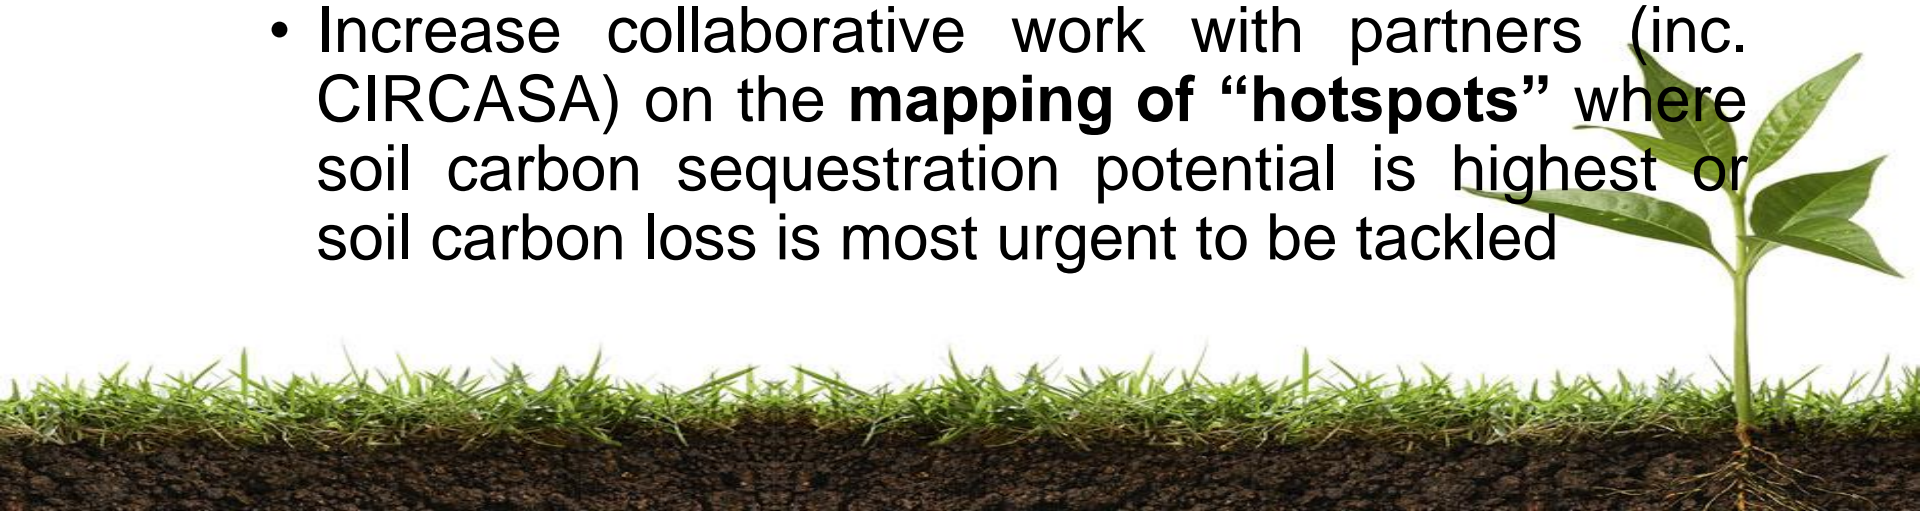

# Continuation of STC work (1)

## Research orientations and scientific cooperation:

RM 2

- Make a **precise inventory of research actions currently conducted** on carbon sequestration in soils
- have a **global vision of "who does what and where"**, to establish Thematic and geographical mapping of these partnerships
- Increase collaborative work with partners (inc. CIRCASA) on the **mapping of "hotspots"** where soil carbon sequestration potential is highest or soil carbon loss is most urgent to be tackled

# Continuation of STC work (2)

## Projects evaluation:

- Following the STC work in 2018, launch **an international call for projects**, incl. from partners, to be assessed with the help of the STC and the ES
- **Specifications** for development of **an existing tool** to facilitate self-assessment by project holders
- Launch of work in voluntary carbon markets to **mainstream the inclusion of soil carbon in existing project evaluation and certification schemes**

RM 3

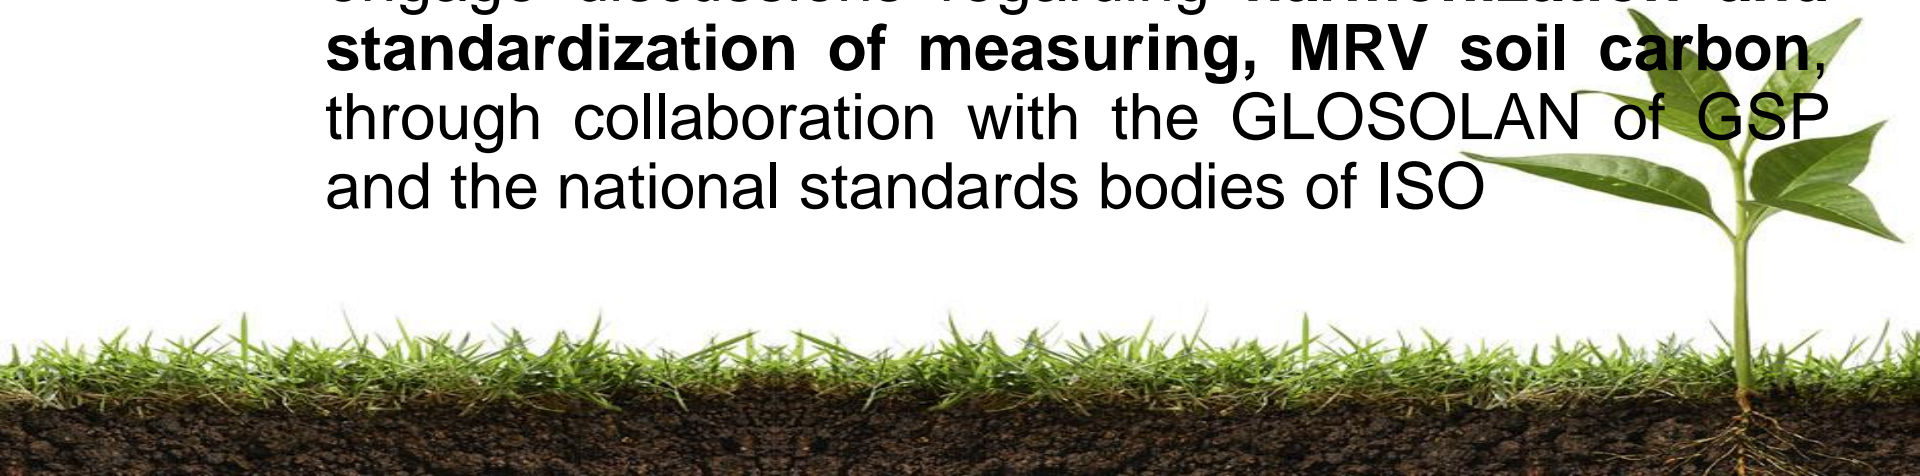

# Continuation of STC work (3)

## Other works:

- Production of **synthesis documents on the scientific aspects** of the "4 per 1000" Initiative
- Documents concerning implementation or elaboration of **good practices**
- **drafting of a book** on the "4 per 1000" Initiative
- engage discussions regarding **harmonization and standardization of measuring, MRV soil carbon**, through collaboration with the GLOSOLAN of GSP and the national standards bodies of ISO

RM 4

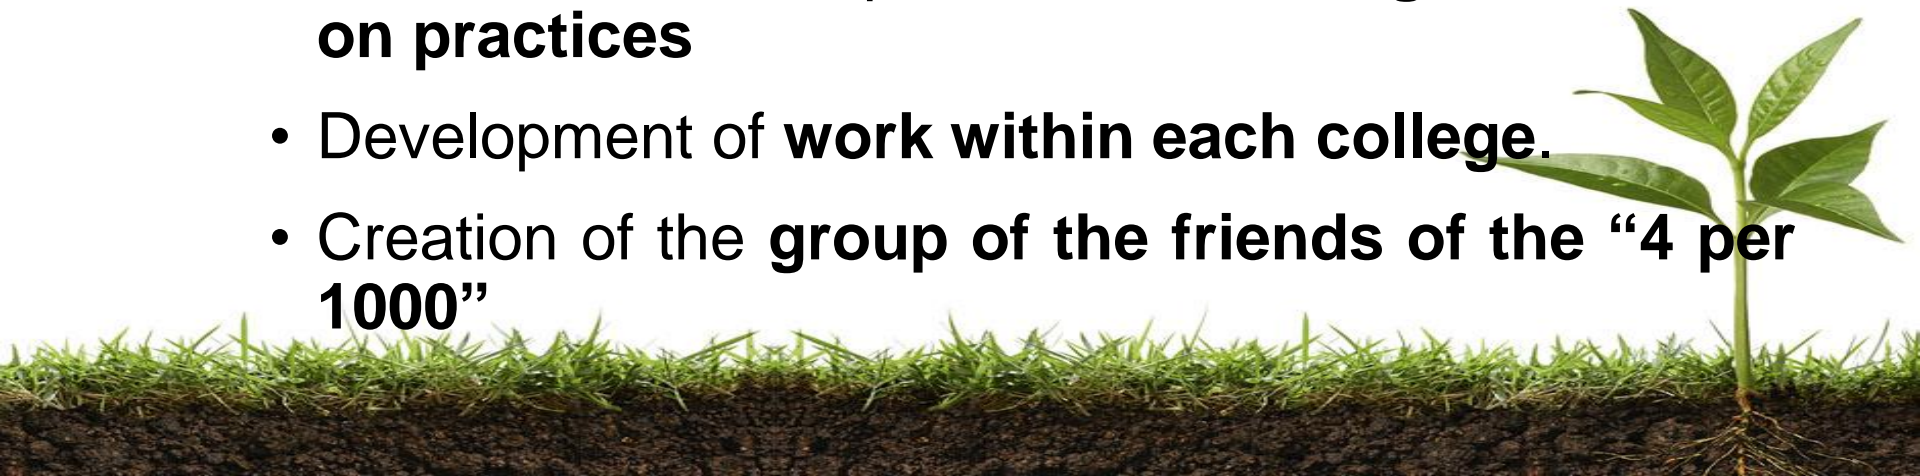

# Collaborative platform

**Officially opened** on 12th September, 2018, the platform has to be animated by partners helped by ES.

RM 5

The platform should develop along the following lines :

- **Identification of all partners** in the Initiative, and their activities within the scope of the Initiative
- **Maps with geographic location** of members and partners
- Establishment of a place for **collecting information on practices**
- Development of **work within each college.**
- Creation of the **group of the friends of the “4 per 1000”**

# Work with public & private funders

To accelerate funders involvement and the widest possible mobilization of public and private funds to support the actions implemented by the project:

RM 6

- Continuation of the **donor awareness** and **fundraising campaign** initiated in 2018 and building a **network of partnerships**
- Seeking **funding for the Executive Secretariat** of the Initiative in particular **support by international foundations** will be sought.
- Work on taking into account the **Green finance** and the **Carbon Markets Initiative**
- Study on the **possibility and the usefulness** of the **creation of a foundation** will be launched

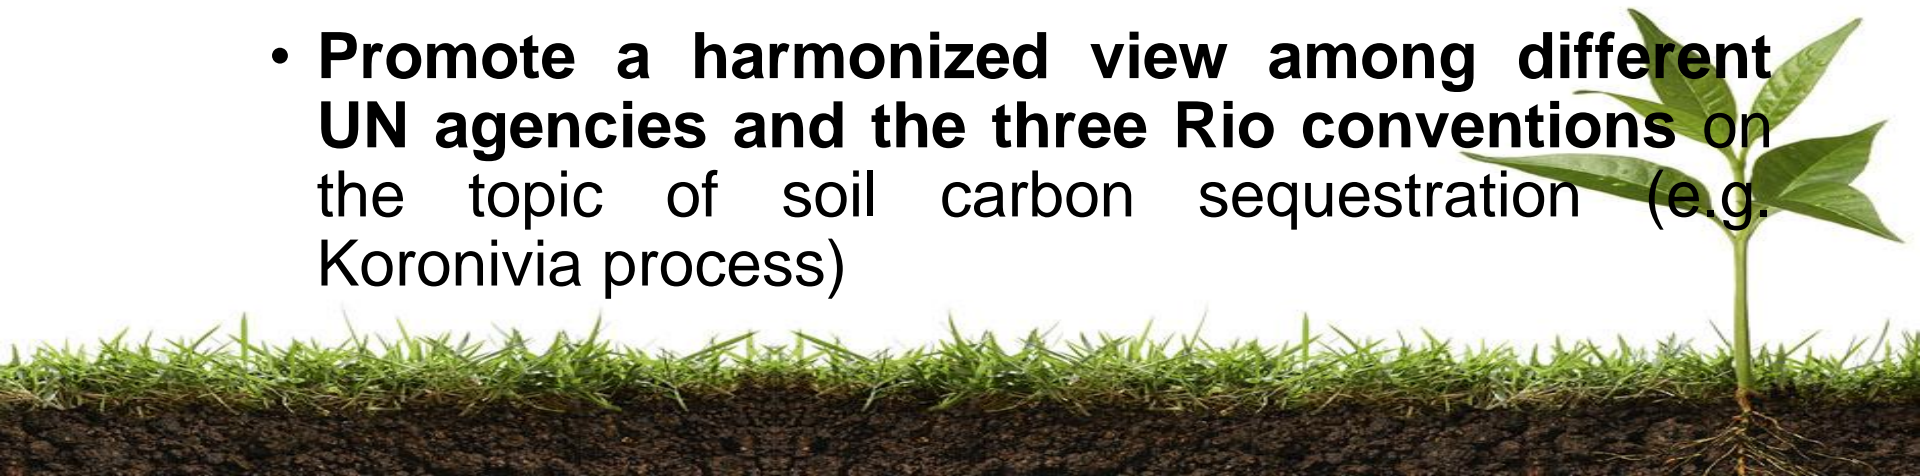

# Contribution to international debates on CSS

Other initiatives include promotion of CSS. To avoid duplication and create synergies with cross-exchanges

RM 7

- **Participation** in meetings, symposia and other conferences
- **Open the meetings of the Initiative Forum to other actors** and discuss that matter
- **Address the issue of exchanges and synergies** to be put in place during the statutory meetings
- **Promote a harmonized view among different UN agencies and the three Rio conventions** on the topic of soil carbon sequestration (e.g. Koronivia process)

# Communication

In line with the action launched or continued in 2018:

- Development and animation of the **regional correspondents' group**
- **website of the "4 per 1000" Initiative** permanent maintenance
- Continuation of the publication of the **newsletter** in French and English, and Spanish if possible
- Regular **contacts with medias** and journalists
- integrate the presence of **the Initiative on social networks**
- Creation of an **award** for a exceptional "4 per 1000" project

RM 8
